About

Hello!

I'm Olof, a 25 year old student from Gothenburg. I have a bachelor's degree in Cognitive Science, and I'm currently pursuing my MSc in Statistics & Machine learning at Linköpings University.

Education

[Linköpings University](#)

Master's degree, Statistics & Machine learning

2021 - 2023

[Linköpings University](#)

Bachelor's degree, Cognitive Science

2018 - 2021

[Rhetorics - Course](#)

06/2020 - 08/2021

[SISU Plattformen - Course](#)

10/2011 - 10/2011

Work experience

Lab assistant - [Linköpings University](#) - Cognitive Science department

July 1, 2021 - Present

I am enrolled as a lab assistant. So far I've been teaching an introduction course in Cognitive Science where we taught students about Excel, Word, Latex and a few labs designed to introduce students towards how an AI act and behave.

Assembler - [Adecco](#)

June 30, 2017 - Present

During the summers I have worked extra on the assembly line at Volvo. This has given me insight about working within the industrial sector, and from this knowledge I'm able to draw concrete parallels when it comes to do's and don'ts when laying the theoretical foundation for practical implementations.

Project-coordinator - [Volvo Group](#)

May 30, 2021 - June 30, 2017

This role revolved around being supportive towards members of different projects. It gave me an opportunity to learn from experts in project organization and presentation, which I value to this day. A great takeaway was that planning and administration is key to accelerating trust and efficiency in a team.

Clerk - [Ica Maxi Torslanda](#)

June 8, 2016 - Dec. 30, 2016

Looking back, I feel this role taught me how being approachable and friendly towards customers directly relates to their retention rate. Being effective with unpacking groceries was important, but building relationships was vital.

Assembler - [Johnson Controls](#)

Aug. 14, 2015 - Dec. 31, 2015

Much like my role at Adecco and Volvo this role revolved around being effective, but here I also learned to cope with adaptation since each week consisted of a different shift.

Project-assistant - [Volvo Group](#)

June 12, 2014 - Sept. 17, 2014

This job included the production of video-presentations, administrative tasks as well as managing documents. Previously I had never made contact with video-presentations, which required I learned it from scratch. A challenging but nonetheless fun task.

Coach - [Hjuviks Båtklubb](#)

June 8, 2011 - Nov. 20, 2014

Being an active sailor I worked as a coach and instructor for youths during several years. It was a fun experience to figure out how to build trust within the group as well as connecting with them on an individual level. This in turn allowed me to pass my expertise and knowledge down to them to the best of my ability.

Contributions

- [Honeylogic](#)

I helped my friend develop his website, giving him insights on the design as well as solving coding issues.

- [findwork](#)

An aggregator that displays remote jobs. Mostly helped with Python / Django.

Projects

- [S-A Vader](#)

My bachelor thesis; a project where I examined the relation between sentiment on Reddits wallstreetbets and the mentioned stocks.

- [Website](#)

I wanted to get a better understanding of Github, servers & domains as well as static websites. Therefor I created a static website using Hugo.

- [Resume](#)

Continuing to explore websites, I launched a dynamic website using wagtail containing a resume for myself.

Volunteering

- [Reception coordinator](#)

Responsible for the reception of new students amongst many other things.
